## What are the key features?

Made with Hydrolyzed Plant Proteins and Organic Herbs

"Free from harmful chemicals, safe for everyday use"

Manufactured in GMP and ISO certified facility

Suitable for people with sensitive scalps and those who want to switch to a herbal hair care routine.

Suitable for All Hair Types

## What are the key ingredients?

Hydrolyzed Oat Protein (Oats Derived), Organic Fenugreek Extract, Organic Ginseng Extract, Organic Pea Sprout Extract, Organic Bhoringraj Extract, Moroccan Argan Oil, Baobab Oil, Hydrolyzed Soy Protein, Hydrolyzed Corn Protein & Hydrolyzed Wheat Protein.

### Information of the key ingredients:

**Hydrolyzed Oat Protein:** It is a popular ingredient in natural hair and skin care products because it can soothe and heal irritated skin. Oat seed proteins have high substantivity on hair and film-forming and protective properties.

**Organic Fenugreek Extract:** Fenugreek (*Trigonella-Foenum Graecum*) is one of the traditional and most promising medicinal herbs in the leguminous family. It helps to promote healthy hair growth, strengthens hair strands, and prevents hair loss.

**Organic Ginseng Extract:** Ginseng is often referred to as the King of all herbs and is found to be a promising agent to improve general well-being. Ginseng and its major bioactive constituents, ginsenosides, may help to promote hair growth by enhancing the proliferation of dermal papilla and preventing hair loss via modulation of various cell-signalling pathways.

**Organic Pea Sprout Extract:** Sprouts are young shoots that develop from germinating seeds. Because the shoots of a plant are especially vulnerable, secondary metabolites are very abundant at this stage. Pea sprouts are a rich source of nutrients like biotin, L-arginine, and secondary plant metabolites such as isoflavones. The high concentration of isoflavones in the pea sprouts might be responsible for the positive effect on hair growth. It supports hair growth and helps prevent hair loss.

**Organic Bhoringraj Extract:** Bhoringraj is a traditional herb used for centuries in Ayurveda. It contains many important phytochemical constituents, such as coumestans, triterpenes, flavonoids, steroids, polypeptides, and saponins. It helps to nourish the scalp and improve hair health. Bhoringraj extract is believed to stimulate hair follicles, promoting the growth of new hair, and improving the overall thickness and density.

**Organic Moroccan Argan Oil:** Argan oil is produced from the argan tree kernels, indigenous to Morocco and southwestern Algeria. It is generally used in cosmetology as a moisturizer to cure devitalized skin. The oil penetrates the hair axis and gives hair a fuller and shinier look.

**Organic Baobab Oil:** Baobab (*Adansonia digitata* L.) is a tree species commonly found in Africa. Baobab oil is rich in vitamins and Omega-3, Omega-6 & Omega-9 polyunsaturated fatty acids, which help to restore dry & damaged hair and keep the scalp healthy and well-nourished. Baobab Oil help to nourish the hair and scalp, reduce breakage, and prevent damage caused by free radicals.

**Hydrolyzed Plant Proteins (Hydrolyzed Soy Protein, Hydrolyzed Corn Protein, and Hydrolyzed Wheat Protein):** Hydrolyzed soy protein, hydrolyzed corn protein, and hydrolyzed wheat protein are all plant-based proteins that have been processed into smaller fragments through a process called hydrolysis. These hydrolyzed proteins can penetrate the hair shaft and help repair and strengthen hair from the inside out. They also help increase the hair's elasticity and reduce breakage, making it look healthier and more voluminous.

## How to use:

Wet your hair, apply a small amount of the shampoo to create a lather

Massage your scalp for 2-3 minutes, and rinse thoroughly with lukewarm water

Use regularly for best results

**Cautions:** Store in a cool, dry place & avoid direct sunlight. Once open, keep it airtight. FOR EXTERNAL USE ONLY.

## Benefits:

Promotes hair growth and prevents hair loss

It improves hair texture and thickness by nourishing the hair follicles

It helps to reduce hair fall and breakage by strengthening the hair strands

Soothes and heals irritated scalp

It provides intense hydration to dry and damaged hair, making it softer and smoother.

It helps to protect hair from environmental damage caused by pollution and UV rays.
